VERSA- WOOD

GARAGE DOORS

Please remember to see maintenance instructions on pg21.

The Versa Wood garage door is a premium option known for its durability, aesthetic appeal, and versatility. Versa-Wood is an ecologically friendly timber with commercial value.

► Material

Versa-Wood is a lightweight hardwood timber with excellent qualities, perfect for our African climate, where doors will most likely be exposed to direct sunlight and rain.

► Lightweight

The Versa Wood garage door puts less strain on garage door hardware and motors.

► Durability

Due to its stability and low weight, Versa-Wood will outlast any other wooden garage door over the years.

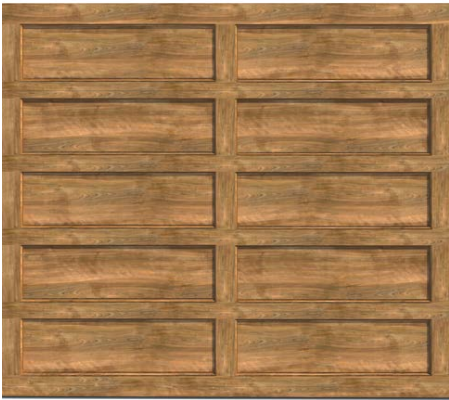

► Resistant to Woodworms and Termites

Versa-Wood has a high tannin content, making it unfavourable for insects.

► Resistant to Bending, Warping, Twisting and Woodrot.

These rendered images depict door designs but are not an accurate representation of the actual timber colors and textures.

FUN FACT

Polycarbonate is used to make aeroplane windows, bulletproof windows and police riot shields.

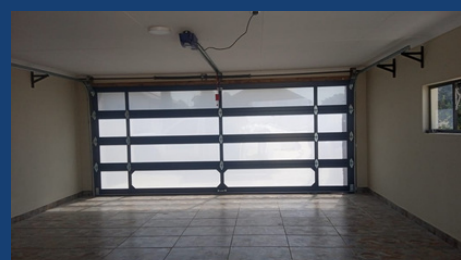

Advantages of Polycarbonate

- Industry reputation for strength
- Shatter resistant
- Durable
- Lightweight
- Natural UV protection
- Flexible

(CODE:GAFD 10H BL)

Door Size: (w) 4940mm x (h) 2170mm
Opening Size: (w) 4880mm x (h) 2135mm

Global building trends inspire our range of aluminium composite garage doors, which are perfect for upmarket homes.

The aluminium panels consist of two aluminium sheets sandwiching a polyurethane fire-resistant core mounted on a durable aluminium frame structure.

ALUMINIUM FRAME COLORS

Black GM Grey Bronze White Champagne Silver

Advantages of Aluminium Composite Panel

- Fluorocarbon coating for UV protection
- High acoustics
- Thermal and fire-rated value
- Weather Resistant
- Smooth Finish
- Various Colour Options

Standard Height
Opening 2135mm / Door 2170mm

SUV Height
Opening 2380mm / Door 2410mm

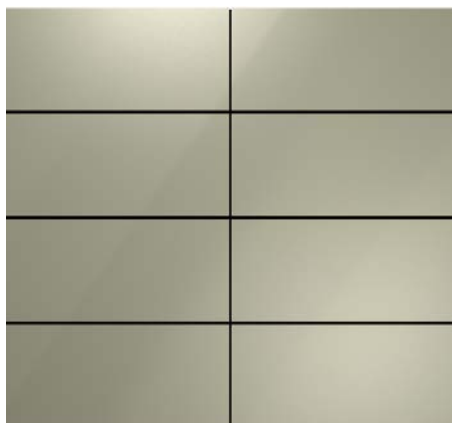

Caravan Height
Opening 2540mm / Door 2570mm

ALUMINIUM COMPOSITE PANEL GARAGE DOORS

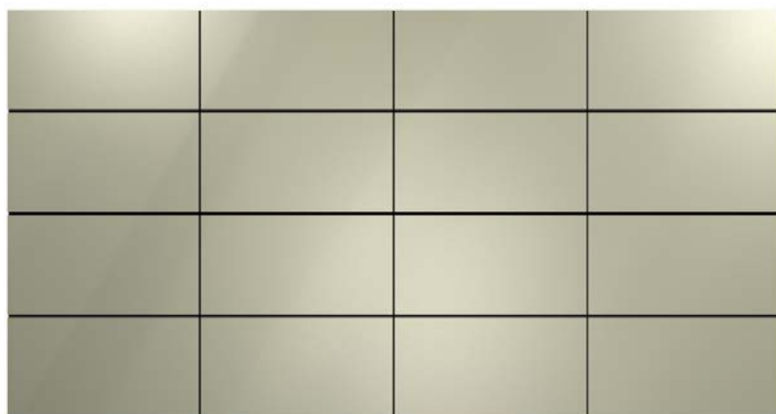

Frame Colors: Black ,Gun Metal Grey, Bronze, White, Champagne, Silver

SINGLE 8 PANEL ALUMINIUM COMPOSITE
(CODE: GAS 8P CP)

DOUBLE 16 PANEL ALUMINIUM COMPOSITE
(CODE:GACS 16P CP)

Door Size: (w) 4940mm x (h) 2170mm
Opening Size: (w) 4880mm x (h) 2135mm

BUDGET FRIENDLY

Alu Zinc garage doors are a more economical option and the market's most affordable garage door type. Alu Zinc doors consist of 55% aluminium and 45% zinc. Although these doors are budget-friendly, they still look great and are very lightweight, which puts less strain on the motor and hardware.

ALUMINIUM FRAME COLORS

Measuring Form (Double)

- Please ensure your garage is cleared of building materials or debris that hamper installation.
- If measurements exceed minimum dimensions, standard garage doors cannot be fitted.
- Removal of old doors will be charged for.

Please fill in the tick boxes with or where applicable

- Electricity on site (Installers are not authorised to do any electrical work)
- Garage is free of building materials and debris
- Installation of garage door and motor
- Ceiling must be finished and screeding must be finished before installation
- Manhole in ceiling for access to roof
- I am aware that I should oil my wooden garage door regularly
- Please specify garage door to be installed eg: Aluminium Horizontal

- A Minimum 400mm
- B Standard 4880mm
- C STD 2135mm
SUV 2380mm
CRVN 2540mm
- D Minimum 150mm
- E Minimum 150mm
- F Minimum 3400mm

Guarantees & Maintenance

- All work done and charged for is guaranteed 12 months from invoice date.
- 12-month guarantee on parts and installation.
- The garage door motor has a 24-month guarantee. (the first 12 months is an on-site repair guarantee. After that, motors must be sent for repairs - a call-out fee will be charged.
- Your garage door needs yearly oiling and service from a certified contractor. Springs need tensioning, and parts need oiling. This will help extend the life of the motor.

MAINTENANCE

TIPS

Oil at least once a year

Do not use varnish

Door Treatment for Wooden Doors

We recommend treating all wooden garage doors with our V-COAT penetrating oil. V-COAT is specifically formulated to penetrate the wood and protect the surface from moisture and sun. We do not recommend varnish on any of our wooden products as varnish only sits on the surface and does not penetrate the wood. Varnish also cracks in the sun, letting rainwater in, trapping moisture underneath, and causing door deterioration.

Annual service recommended for all garage doors

A service would include the following

- Testing the auto-reverse safety features
- Checking and lubricating moving parts
- Re-tensioning and lubricating the spring to make sure the door is properly balanced
- Checking the high-tension cables for broken strands and replace them if necessary.
- Checking and retightening the wall anchors.
- Applying a single coat of protective clear oil on external wood.
