Jannie JKH Enterprises 082 813 9692	Titus 073 947 6957

VAN ACHT can only guarantee frameless doors installed by accredited VAN ACHT installers. There must be no margin for error during the installation of these doors, and since frameless doors cannot be modified to fit, a perfect installation must be achieved on the first attempt.

****Important Information:** Please look over all materials before installation. Ensure that all frames are entirely level and plumb. It is essential to treat or oil the timber immediately after inspection and before installation; for instance, all six sides of a door should be treated. Some carpenters prefer to install the sliding frames themselves, so consult them when scheduling an appointment. *Confirm that your carpenter seals the top and bottom of your door correctly***

We only recommend using V-COAT on all our wooden products!
